

Networking Activity N3 (WP4):

Meetings and Infrastructure Related Workshops

Harald Saathoff

IMK-AAF

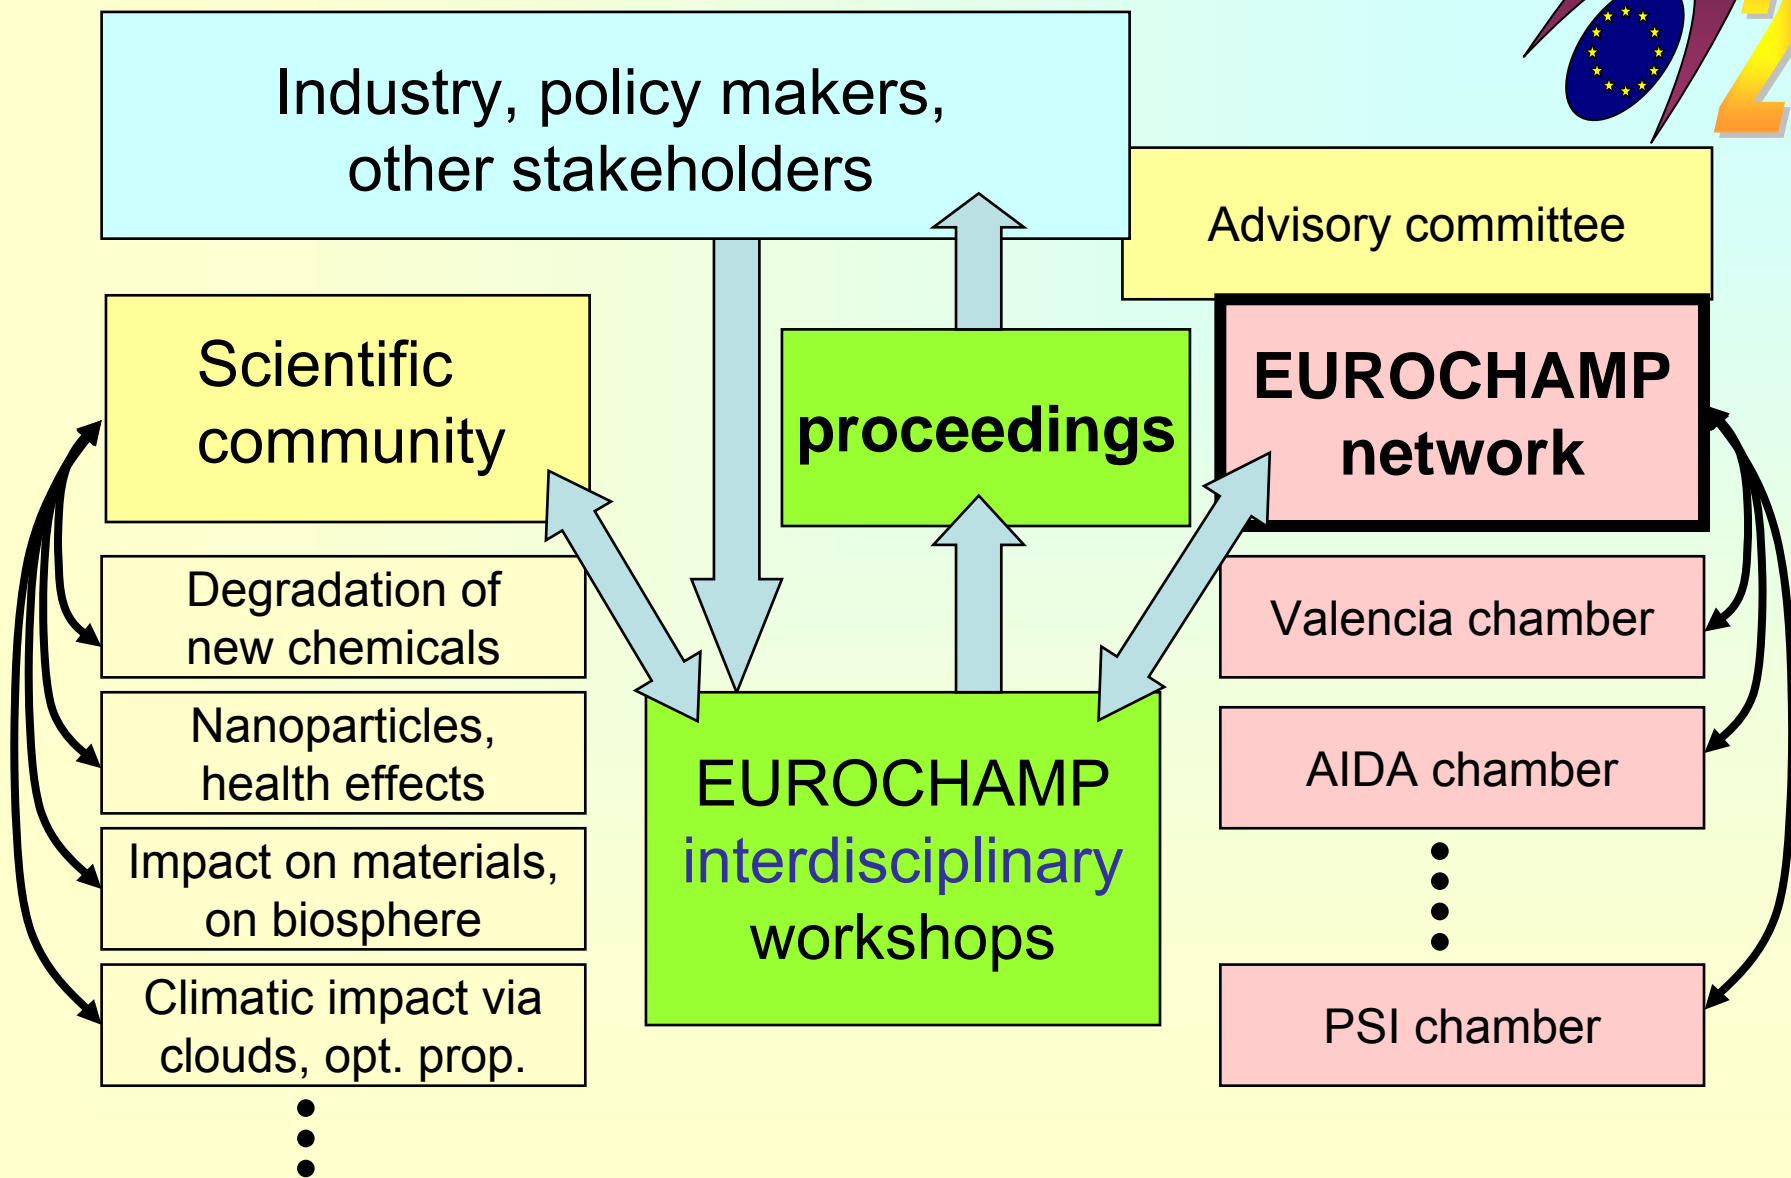

Forschungszentrum Karlsruhe (FZK, Partner 8)

Objectives for Activity N3:

- To provide an optimum flow of information within EUROCHAMP by holding **periodical meetings** of the project partners.
- To provide a forum for an interdisciplinary discussion on different impacts of simulation chamber studies with a broad spectrum of scientists by holding a few **larger infrastructure related workshops**.
- To increase the visibility of and to further distribute information about the research options at the simulation facilities by organising **special sessions** within workshops of other projects and at larger conferences.

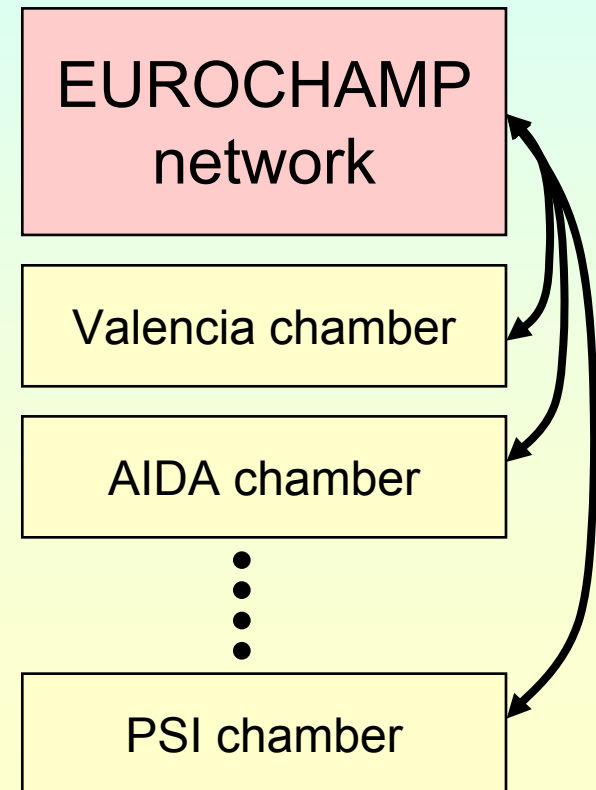

Smaller, topic-orientated workshops must be organised to meet the needs of the EUROCHAMP network

These will be organised amongst the partners of the EUROCHAMP network on an ad-hoc basis, as needs arise.

They may involve all or just a sub-set of the EUROCHAMP network, in order to work efficiently.

Some workshops will most likely be organised in close cooperation between the EUROCHAMP network and other EU projects (e.g. EUSAAR).

Schedule for Activity N3:

N3 MILESTONES AND DELIVERABLES		Year 1						Year 2						Year 3						Year 4					
		2	4	6	8	10	12	14	16	18	20	22	24	26	28	30	32	34	36	38	40	42	44	46	48
M	Partners' meetings	█					█						█						█						█
D	Partners' meetings protocols	█					█						█						█						█
M	Workshops addressed to special topics								█						█						█				
D	Proceedings of each workshop organised									█							█						█		
M	Special sessions organised at larger conferences					█					█							█						█	
D	Protocol of special sessions organised at larger conferences					█					█							█						█	
D	Common publications for a wider public						█																		█

N3 Dissemination of results:

The abstracts, presentations, and protocols of the EUROCHAMP-2 workshops will be made available via the EUROCHAMP homepage.

<http://www.eurochamp.org/events/>

Publications on workshop results will also appear in peer reviewed journals and newsletters.

Common publications will be prepared to inform a wider public via selected journals or newspapers.

In view of so many events being organised Europe-wide it is necessary to keep track of up-coming conferences and workshops which cover the scope of the EUROCHAMP community,

- ▶ to avoid duplication
- ▶ to avoid undue overlap

You can find a fairly complete list of conferences / workshops on our AIDA homepage:

<http://imk-aida.fzk.de/conf/>

We will update this list permanently. Therefore,

please let us know if you have information on conferences/workshops which should be added to our list!

Topics suggested for three larger workshops:

- Studies of secondary organic aerosol in environmental chambers – New aspects for science and policy
- Interaction between air pollution and human health – Environmental chambers as diagnostic tools
- Simulation chambers between field measurements and model development – What is the benefit for our understanding of the atmosphere

Planning the 1st EUROCHAMP-2 workshop, ideas, considerations, to be discussed today:

1. Topic of workshop: ?
2. Possible partners: ?
3. Timing of the workshop: ?
4. Location of the workshop: ?

First Activities:

EUROCHAMP 2 Kick Off Meeting

Binz, May, 13th 2009

Workshop on ...

2009
