

Workshop on modeling chamber experiments using AtChem

Location : School of Computing, University of Leeds (Maps attached)

Date: February 16, 17 2010, starting at 12:30

Programme

16.2.10

12:30 Lunch, level 7, School of Computing (paradoxically this is the ground floor, near the entrance to the School. We'll have someone there to direct you)

13:30 Workshop. Room 8.01, School of Computing (one floor up)

Brief presentation on the box model chamber code, AtChem by Jenny Young. The rest of the afternoon will be free to try the code. We will provide a number of simulations you might like to try. At the end of the afternoon we would like a brief discussion. We'd like you to comment on the code and make suggestions for improvements, e.g. in the functionality.

19:30 Dinner in Leeds. The present plan is to go to a Chinese restaurant

17.2.10

08:30 Continue working on simulations.

11:15 Discussion on the electronic lab notebook proposals, led by Mo Haji, Peter Dew and Mike Pilling.

12.45 Brief discussion of the use of the Eurochamp database in modeling studies (Theo Brauers and Gordon McFiggans)

13:00 Lunch

14:00 Continue simulations. Continue discussion on the code.
